To Whom It May Concern:

I am pleased to write that City Garage has enjoyed a tremendous improvement to the quality and efficiency of our lighting system purchased from SIB Lighting, and I would like to recommend them to my peers.

SIB Lighting performed a full audit of our lighting prior to the project, which included an ROI analysis. The review allowed us to fully understand the benefits of replacing our old inefficient T12 lights which included improving the lighting quality, while increasing safety and energy savings.

SIB helped retrofit and replace all of our inefficient light fixtures for 4 locations with LED strip kits and wall packs. Light levels were improved significantly and energy consumption was reduced by approximately 33%.

We are extremely pleased with the results of the project. We wouldn't hesitate to work with SIB Lighting again, and we believe any company would benefit from their service.

Sincerely,
