To Whom It May Concern:

I am pleased to recommend SIB Lighting with David Etzler based on the outstanding job they did for The Slade Condominium.

SIB Lighting with David Etzler helped us through the entire process of evaluating our prior lighting design, making recommendations to improve light levels and reduce energy, removing old fixtures, and installing new fixtures.

SIB Lighting with David Etzler designed, engineered, and installed new LED parking garage fixtures to replace inefficient metal halide fixtures. They also created a photometric design that resulted in an increase in light levels of over 200%. As a result, energy costs were reduced substantially and the property no longer has expensive and time consuming maintenance issues in our garage.

We are extremely pleased with the results of the project and enthusiastically recommend SIB Lighting with David Etzler to any business that wants to improve their lighting and reduce energy expenses.

Sincerely,

Leslie Bassat
