To Whom It May Concern:

Please accept this recommendation for SIB Lighting on behalf of the Veranda at Plantation Condominium. SIB Lighting performed an audit of our lighting and identified outdated, inefficient lighting in our parking garage and lobby.

SIB Lighting then retrofitted over 300 vapor tight fixtures in our parking garage from fluorescent tubes to high quality and highly efficient LED strip kits. The garage achieved a significant improvement in light levels and maintenance has been eliminated. SIB Lighting also replaced the inefficient small flood lights in our lobby. The project has saved us over 60% on our lighting costs.

We are very happy with this project and are grateful to SIB Lighting for their great work. We would happily recommend SIB Lighting to our peers.

Sincerely,

John Sims, Manager
