

MVP Group International's manufacturing facility in Union City, Tennessee, was in dire need of a lighting upgrade. Not only did we hope to reduce our energy spend, we also wanted to brighten and improve the aesthetics of our facility. We hired SIB Lighting for our LED upgrade and we're extremely pleased with the results.

By way of background, MVP Group International designs and manufactures various private label and branded candles, candle accessories, home fragrance products, and decorative accessory gift products for major retail customers throughout the world. Increased productivity and the bottom line impacts of reducing our expenses help us exceed our customers' expectations for quality.

SIB Lighting replaced 785 fixtures with American-made LED lights that have a 10-year warranty. This upgrade resulted in a 70% reduction in our energy consumption, which represents an estimated \$1,400,653 in savings over 10 years and a **return on investment of over 446%**.

Needless to say, we are completely satisfied with SIB Lighting and we're exploring upgrades to some of our other facilities. SIB Lighting has earned our highest recommendation.

Sincerely,

Robert Eason
