

Success Story

ALFINITI

Alfiniti is a manufacturer of aluminum products, drawn tubing and aluminum extrusions. They work in partnership with customers to identify needs, requirements and constraints, developing the right solutions for their customers.

Finding the best, most effective solution for the customer is also SIB Lighting's mission. Our engineers identified the light fixtures necessary to maximize the incentives and rebates, making suggestions that were different from what Alfiniti originally thought they needed.

Working with SIB's professional lighting consultants not only improved aesthetics and visibility in Alfiniti's facility, it also resulted in an 80% reduction in lighting-related energy costs, \$57,631 in rebates and payback in less than a year.
